Summary

Results-driven Full Stack Developer and Mobile App Developer with 2+ years of hands-on experience building and deploying scalable web and mobile applications. Proficient in React.js, Laravel, Flutter, Node.js, and RESTful API development, with practical experience in MySQL, Firebase, and Supabase. Proven ability to deliver responsive, performance-optimized applications across both frontend and backend, with exposure to JWT/OAuth authentication, Agile workflows, and Git-based collaboration. Passionate about writing clean, maintainable code and building real-world solutions that solve user problems.

Education

B.Sc. (Hons) in Software Engineering Asia Pacific University of Technology and Innovation (APU/APIIT)	Colombo, Sri Lanka 2024 - 2027
Diploma in Computing ESOFT Metro College	Wattala, Sri Lanka 2023 - 2024

PROFESSIONAL EXPERIENCE

APIIT (Asia Pacific Institute of Information Technology) IT Department Tech Team Intern	Colombo, Sri Lanka 2026 - Present
- Assembled, configured, and maintained desktop computers and hardware equipment for staff and students. - Diagnosed and troubleshoot hardware and software issues to ensure smooth IT operations across the campus. - Provided technical support and assistance to staff and students as an IT technician. - Contributed to internal web application development and software initiatives within the IT department. - Managed and maintained IT infrastructure and equipment to ensure optimal performance.	
Ceylon Innovation Services Full Stack Developer & Mobile App Developer	Negombo, Sri Lanka 09/2025 - 12/2025
- Built and deployed full stack web and mobile applications using React.js, Laravel, and Flutter, delivering responsive, cross-platform user experiences. - Developed and integrated RESTful APIs with JWT/OAuth authentication, connecting frontend interfaces with MySQL and Firebase backends. - Contributed to mobile app development using Flutter, building cross-platform features with real-time Firebase data handling.	
Ceylon Innovation Services Full Stack Web Developer (Intern)	Negombo, Sri Lanka 03/2025 - 08/2025
- Developed and deployed scalable web applications using React.js and Laravel, focusing on performance, maintainability, and user experience. - Improved application performance through code splitting, lazy loading, caching strategies, and backend query optimization. - Implemented SEO best practices including meta tags, structured data markup, and performance tuning to improve search visibility. - Designed and maintained RESTful APIs with secure JWT/OAuth authentication and seamless frontend-backend integration using MySQL and Firebase. - Applied clean architecture principles and reusable component design to produce scalable, maintainable codebases. - Collaborated in Agile/Scrum workflows using Git/GitHub for version control, code reviews, and team coordination.	

SKILLS

Programming Languages: JavaScript (ES6+) • TypeScript • Dart • PHP • Python

Frontend Development: React.js • Next.js • HTML5 • CSS3 • Tailwind CSS • Bootstrap • Responsive Design

Backend Development & Frameworks:

Laravel • Node.js • RESTful API Development • MVC Architecture • JWT/OAuth Authentication

SKILLS

Mobile Development: Flutter · Dart · Cross-Platform App Development · Firebase Integration

Databases & Tools: MySQL · Firebase · Supabase · SQL Server · Git · GitHub · Postman · Vercel

Software Engineering: OOP · Agile/Scrum · Unit Testing · Code Optimization · Data Structures & Algorithms · Problem Solving

Projects

Safari Hub — Full Stack Travel & Booking Platform

Tech Stack: React.js, Node.js, Firebase, Supabase | GitHub: github.com/movindu477/safarihub-main

- Built a full-stack travel platform enabling users to explore Sri Lankan destinations and book jeep drivers and tour guides, with real-time availability and booking functionality.
- Designed and implemented a responsive, user-friendly UI with seamless frontend-backend integration using React.js and Node.js.
- Integrated Firebase and Supabase for authentication, real-time database management, and scalable backend services.

Texora — AI-Powered Fashion Design Mobile Application

Tech Stack: Flutter, Firebase, Gemini API, Stability AI API | GitHub: github.com/movindu477/fashion_app_new

- Developed a cross-platform mobile application using Flutter that allows users to capture fabric images and generate fashion design sketches using AI.
- Integrated Google Gemini API and Stability AI API to deliver intelligent, AI-driven design generation with creative outputs.
- Implemented secure Firebase authentication, real-time data handling, and scalable backend services for smooth performance.

Moley's POS System — Flutter-Based Point of Sale Application

Tech Stack: Flutter, Dart | GitHub: github.com/movindu477/Moley-s-Frontend-Interface

- Built a fast, responsive POS interface optimized for POS hardware, enabling efficient billing, item management, and sales operations.
- Designed intuitive checkout and transaction workflows to improve speed and usability for cashiers in high-traffic retail environments.
- Focused on Flutter performance optimization to ensure smooth, reliable operation under continuous real-world usage.
